

# Kiran Aryal

## Associate Software Engineer

---

**Phone:** +977 9847297415

---

### Summary

Energetic Student with Bachelor's Degree in Computer with experience on Power Platform , Dynamics , SQL building different applications, Solutions and Flows . Detail oriented and motivated to stay on task and accomplish goals.

---

### Technical Skills

**Languages and Scripts:** Javascript, Dart, C#

**Frameworks and Libraries:** .Net, Node Js, React Js

**Database:** MySql, Firebase, MongoDB

**VCS:** Git, Github

**Collaboration:** Slack, JIRA

**Methodology:** Scrum

---

### Experience

**Associate Software Engineer, Power Platform, Leapfrog Technology Pvt. Ltd.(November 2021- Present)**

- Working as a developer in a Power Platform project
- Working on Canvas application, Model driven application, plugins, webresources, workflows, Microsoft Dynamics, SSMS

**Internship in Power Platform, Leapfrog Technology Pvt. Ltd.(September 2021 - November 2021)**

- Got to know about different areas of Power Platform like Power Apps, Power BI, Virtual Agents, Power Automate.
  - Learned about creating, importing and exporting of solutions to different Environments
  - Learned to build Canvas and Model driven application for different solution
  - Learned visualization using Power Bi
  - Learned creating different Flows
- 

## **Projects**

### **Library Management System**

A system which helps to manage a Library by keeping track of Students and Books inventory. A staff (Librarian) has all controls of creating, editing and deleting Student records, adding new books to the inventory, updating books availability and keeping track of assigned books to the students.

#### **Role:**

- Developed Canvas and Model-driven applications using Power Apps
- Maintaining Validations in application using Plugins and Webresources
- Developed flows for notifications and managing books inventory

### **Sajilo(On-demand Home Services)**

Sajilo is my final year project, a platform for clients and workers where clients could find different household solutions and workers could reach clients. Clients and workers can create and update their profile, clients can book a service and see booking history for pending, ongoing and completed services, workers can accept different jobs.

#### **Role:**

- Collaborating with team members to figure out efficient data models
  - Configuring and writing base code for front end of the application
  - Developing front end of the application using Flutter
  - Research and implementation of newer features that improve the overall performance of the application
-

## **Education**

### **Pokhara University**

Bachelor in Computer Engineering, Nepal Engineering College, Bhaktapur(Pokhara University)  
(2016-2021)

### **HSEB**

+2 Science, Tilottama College, Butwal (HSEB) (2014-2016)

### **SLC**

New Horizon English Boarding Higher Secondary School, Butwal (2014)
